

A large, light blue, fluted pumpkin (Ugu) is the central focus of the image. It has a ribbed, elongated shape and is growing in a garden bed. The surrounding area is filled with green foliage, including large leaves and smaller plants, and some dry, brownish ground is visible. The lighting is natural, highlighting the texture of the pumpkin and the vibrant green of the leaves.

5-Step Simple Ugu (Fluted Pumpkin) Planting Guide

1

GET A CLEAN SOIL AND MANURE

*Collect clean loamy soil
free from stones, sticks,
and debris.*

*Mix it well with dried
poultry manure*

2

FORM THE RAISED BED

Shape the soil into a raised bed about 6–8 inches high. Make sure the top is flat and level for good drainage.

3

MAKE PLANTING HOLES

Use your finger or a stick to make small holes (about 2–3 cm deep) on the raised bed

4

PLANT THE UGU SEEDS

Place Ugu seeds in the holes with the pointed end facing down. Cover lightly with soil.

5

WATER AFTER PLANTING

Water the bed gently to keep the soil moist (but not soaked).
